Focus shifting beyond 2025

Relais' Q2 adjusted EBITA came in well in line with LSEG Data & Analytics consensus expectations. Despite softer market conditions in Q2, the company sees early signs of improving demand for H2. Following the acquisition spree in 2025, we continue to regard its financial target of above EUR 50m pro forma EBITA as achievable and expect the company to issue ambitious new financial targets towards the end of the year. We derive a slightly higher DCF- and multiples-based fair value range of EUR 19.2-23.4 (18.3-22.4), mainly owing to higher peer multiples.

Q2 largely in line with expectations

Relais' Q2 net sales of EUR 82.9m topped LSEG Data & Analytics consensus expectations by 5% and were up 12% y/y (down 2% on an organic basis). Q2 adjusted EBITA of EUR 7.6m came in 2% above consensus expectations. EPS was well below expectations, but driven by FX fluctuations as interest expenses were largely in line with our expectations. Equipment and Spare Parts beat our sales estimates, while Repair and Maintenance fell slightly short of our expectations in the soft market. The company has seen early signs of improving market demand, which bodes well for its significantly expanded workshop network following the Team Verksted acquisition. Inventory levels are somewhat elevated following the warm winter, which led to temporarily weaker cash flow in Q2. We believe the company's near-term focus will be on driving synergies from the recent acquisitions. We also acknowledge its clear growth path in, for example, the repair and maintenance market, which we believe is mainly targeted through acquisitions.

Minor estimate revisions – demand set to improve for H2

Following the Q2 report, we make only minor estimate revisions. We are 2-3% above pre-Q2 LSEG Data & Analytics consensus on sales and 5-14% ahead on adjusted EBITA for 2026E-27E. Relais' strategy period ends in 2025 and we view the EUR 50m pro forma EBITA target as achievable without additional acquisitions. However, this likely requires recovery, to positive organic growth for H2. The company is likely to issue new ambitious targets towards the end of the year. We expect the company to target at least EUR 70m adjusted EBITA by 2028.

More M&A firepower through potential equity raise

We note that Relais is funding the Team Verksted acquisition via bridge financing, and that it aims to refinance with equity or equity-like financing. As we expect the company to announce a new ambitious target during H2, with a continued focus on market consolidation, we believe it could raise equity in conjunction with the refinancing of the bridge facility to create strategic M&A headroom for larger acquisitions from 2026 onwards.

Q2 results and estimate revisions

Relais' Q2 adjusted EBITA of EUR 7.6m was up 3% y/y and 2% above LSEG Data & Analytics consensus of EUR 7.5m. Organic sales growth was -2% y/y in Q2 (in line with our expectation), weighed down by softer market conditions. Net sales were EUR 82.9m (+12% y/y), 5% above consensus expectations and supported by acquisitions. The gross margin came in 120bp below consensus expectations, while it was up 140bp y/y, to 49.1%, likely burdened to some extent by the slightly softer repair and maintenance market. Operating cash flow declined owing to the mild winter's impact on net working capital and was EUR -0.2m (EUR 9.5m a year ago), which combined with the acquisition of Team Verksted took leverage to 4.4x. Relais did not provide a short-term outlook for 2025, but notes cautious, positive signs of demand improvement for H2.

Valuation

We value Relais using a variety of methods, including a peer multiples-based valuation and a discounted cash flow (DCF) model. We only include organic growth potential in our valuation approach and exclude any impact from potential future M&A. Using a combination of valuation methods, we derive a fair valuation range of EUR 19.2-23.4 per share.

Background

Our valuation does not include M&A

We acknowledge the company's ambition to continue growing at an accelerated pace, which includes a significant M&A component. However, because the potential targets, their sizes and fundamentals are unknown, we refrain from including any speculative M&A in our estimates.

We use a range of valuation methods to derive a fair value for Relais. In our analysis, we compare the company to a group of peers that we consider relevant, using valuation multiples such as EV/EBITDA and P/E. We also use a standard DCF model. The table below shows the peer group.

PEER VALUATION TABLE

EV/EBITDA-based valuation of EUR 19.4-23.4 per share

Based on our EUR 76m EBITDA estimate for 2026 and an accepted valuation multiple range of 8-9x (midpoint: 8.5x), we arrive at a fair value range of EUR 19.4-23.4 per share for Relais. In addition to auto parts peers, we believe that one should look at Swedish compounders when valuing Relais. Using a 70% weight for the auto parts peer group and a 30% weight for the compounder peer group, the median EV/EBITDA would be 9.7x for 2026E.

P/E-based valuation of EUR 19.0-23.3 per share

Using a EUR 1.57 EPS estimate for 2026, we arrive at a fair value range of EUR 19.0-23.3 per share using P/E multiples of 12.2-14.9x (midpoint: 13.5x). Using a 70% weight for the auto parts peer group and a 30% weight for the compounder peer group, the median P/E would be 19.6x for 2026E.

DCF-based valuation of EUR 19.1-23.3 per share

In our DCF model, we value Relais based on the current business, assuming no additional value-adding acquisitions. We also assume a sales CAGR of 5.6% for 2025-30, followed by a 2.5% CAGR in perpetuity, meaning that organic growth is roughly the same as the average rate of inflation. We also assume that Relais will gradually improve its profitability level and maintain an adjusted EBIT margin of 12.5% in the long run. We use a 4% cost of debt in our DCF model. We also assign a long-term equity weight of 60%.

DCF valuation sensitivity

To test the robustness of our base-case scenario, we perform a sensitivity analysis by varying our EBIT margin, sales growth and WACC assumptions. The DCF-derived fair value is especially sensitive to WACC assumptions, implying that changes in the company's risk profile could significantly impact the fair value in either direction. When we use sensitivities of ± 0.5 pp for WACC, ± 0.5 pp for sales growth and ± 0.5 pp for the EBIT margin, our DCF model yields a value range of EUR 17.6-25.0 per share.

Risk factors

Below, we list the main risk factors that we find relevant for Relais Group. The purpose of this is not to provide a comprehensive picture of all the risks that the company may face, but instead to highlight those that we find the most relevant. The main risks we identify relate to the general economy in the Nordics, car spare parts sales and the vehicle service business. After the COVID-19 pandemic, the company is facing a tougher environment for B2C, mainly due to lower consumer confidence and high inflation.

A sluggish economy could negatively affect car service and spare parts sales	<p>General economy</p> <p>The car service industry is to some extent dependent on the general economy. In times of strong economic activity, people are more inclined to spend money on car service and upgrades. Typically, unemployment rates decrease at such times, which also increases consumers' disposable income. The outlook for Nordic economies has suffered from geopolitical tensions. If people start cutting back on car service spending and/or postpone servicing their cars, Relais could see a negative impact on its sales and earnings. After recent acquisitions, Relais is also more dependent on commercial vehicles and related services, which could be affected if economic activity deteriorates. Recent additions to the service business should improve business predictability, albeit with lower seasonality</p>
Competitors consolidating the market could hamper Relais' growth prospects	<p>Increasing competition</p> <p>The auto parts market is still very fragmented. If other players take a more active role in market consolidation, this could hurt the sales prospects for Relais and profitability if competitors become more aggressive on pricing.</p>
Disturbances by suppliers may affect product availability	<p>Dependence on suppliers</p> <p>As Relais imports its goods and does not produce spare parts or equipment itself, the company could be severely affected if its suppliers cannot deliver products as agreed or if the quality of products decreases significantly.</p> <p>The COVID-19 pandemic created supply-side problems and extra freight costs, which have not been fully resolved yet. A prolonged situation could hamper demand for Relais' spare parts and equipment.</p>
If not executed well, high M&A activity may increase costs	<p>Risks related to expansion</p> <p>Relais' ambitions to grow quickly do not come without costs, investments and risks. M&A could increase costs temporarily, but also in the long term if acquisitions fail or integration is executed poorly. Hence, it is important for the company to maintain good cost control and clear M&A execution plans, so as not to hamper earnings.</p>
Key employees leaving could lead to the loss of clients	<p>Dependence on key employees</p> <p>Relais depends heavily on the efforts of its management team and the board of directors. These key persons have substantial knowledge of running listed companies as well as broad sector knowledge. Should these people leave, it could take some time to find replacements. If key employees join a competitor or start a competing business, this could significantly hamper Relais' business, leading to the loss of clients or even suppliers. Also, because Relais does not fully integrate acquired companies, its dependence on acquired key employees is high. Should Relais fail to incentivise employees in the acquired companies, this could directly impact sales and earnings.</p>
A share issue could dilute current shareholders' ownership	<p>Financial position</p> <p>Relais has high growth ambitions, hence we do not rule out the need for additional equity to support future M&A activity. An equity issue could dilute the current shareholders' ownership.</p>
A significant writedown of goodwill could worsen its financial position	<p>Substantial amount of intangible assets</p> <p>Due to M&A, Relais has accumulated significant goodwill on its balance sheet. If a future test shows a considerable decline in the value of goodwill, this could have a huge impact on the balance sheet and earnings. A weakening balance sheet could limit the potential for new financing and thus have a negative impact on future M&A and operations.</p>
Tech failures could put Relais in a disadvantageous position	<p>IT systems</p> <p>Relais depends on its IT systems, and any disruption to these could affect the company's daily business, costs and reputation. Slow adoption of or adaptation to new technology could leave Relais in a disadvantageous position versus its competitors.</p>

Disclaimer and legal disclosures

Origin of the publication or report

This publication or report originates from: Nordea Bank Abp, including its branches Nordea Danmark, Filial af Nordea Bank Abp, Finland, Nordea Bank Abp, filial i Norge and Nordea Bank Abp, filial i Sverige (together "Nordea") acting through their units Nordea Markets and Equity Sales & Research.

Nordea Bank Abp is supervised by the European Central Bank and the Finnish Financial Supervisory Authority and the branches are supervised by the European Central Bank and the Finnish Financial Supervisory Authority and the Financial Supervisory Authorities in their respective countries.

Content of the publication or report

This publication or report has been prepared solely by Nordea Markets or Equity Sales & Research.

Opinions or suggestions from Nordea credit and equity research may deviate from one another or from recommendations or opinions presented by other departments in Nordea. This may typically be the result of differing time horizons, methodologies, contexts or other factors.

Investment opinions, ratings, recommendations and target prices are based on one or more methods of valuation, for instance cash flow analysis, use of multiples, behavioural technical analyses of underlying market movements in combination with considerations of the market situation and the time horizon. Key assumptions of forecasts, ratings, recommendations, target prices and projections in research cited or reproduced appear in the research material from the named sources. The date of publication appears from the research material cited or reproduced. Opinions and estimates may be updated in subsequent versions of the publication or report, provided that the relevant company/issuer is treated anew in such later versions of the publication or report.

Validity of the publication or report

All opinions and estimates in this publication or report are, regardless of source, given in good faith, and may only be valid as of the stated date of this publication or report and are subject to change without notice.

No individual investment or tax advice

The publication or report is intended only to provide general and preliminary information to investors and shall not be construed as the basis for any investment decision. This publication or report has been prepared by Nordea Markets or Equity Sales & Research as general information for private use of investors to whom the publication or report has been distributed, but it is not intended as a personal recommendation of particular financial instruments or strategies and thus it does not provide individually tailored investment advice, and does not take into account the individual investor's particular financial situation, existing holdings or liabilities, investment knowledge and experience, investment objective and horizon or risk profile and preferences. The investor must particularly ensure the suitability of an investment as regards his/her financial and fiscal situation and investment objectives. The investor bears the risk of losses in connection with an investment.

Before acting on any information in this publication or report, it is recommendable to consult one's financial advisor. The information contained in this publication or report does not constitute advice on the tax consequences of making any particular investment decision. Each investor shall make his/her own appraisal of the tax and other financial merits of his/her investment.

Sources

This publication or report may be based on or contain information, such as opinions, recommendations, estimates, price targets and valuations which emanate from: Nordea Markets' or Equity Sales & Research analysts or representatives, publicly available information, information from other units of Nordea, or other named sources. To the extent this publication or report is based on or contain information emanating from other sources ("Other Sources") than Nordea Markets or Equity Sales & Research ("External Information"), Nordea Markets or Equity Sales & Research has deemed the Other Sources to be reliable but neither Nordea, others associated or affiliated with Nordea nor any other person, do guarantee the accuracy, adequacy or completeness of the External Information.

The perception of opinions or recommendations such as Buy or Sell or similar expressions may vary and the definition is therefore shown in the research material or on the website of each named source.

Limitation of liability

Nordea or other associated and affiliated companies assume no liability as regards to any investment, divestment or retention decision taken by the investor on the basis of this publication or report. In no event will Nordea or other associated and affiliated companies be liable for direct, indirect or incidental, special or consequential damages resulting from the information in this publication or report.

Risk information

The risk of investing in certain financial instruments, including those mentioned in this document, is generally high, as their market value is exposed to a lot of different factors such as the operational and financial conditions of the relevant company, growth prospects, change in interest rates, the economic and political environment, foreign exchange rates, shifts in market sentiments etc. Where an investment or security is denominated in a different currency to the investor's currency of reference, changes in rates of exchange may have an adverse effect on the value, price or income of or from that investment to the investor. Past performance is not a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. When investing in individual shares, the investor may lose all or part of the investments.

Conflicts of interest

Nordea, affiliates or staff in Nordea, may perform services for, solicit business from, hold long or short positions in, or otherwise be interested in the investments (including derivatives) of any company mentioned in the publication or report.

To limit possible conflicts of interest and counter the abuse of inside knowledge, the analysts of Nordea Markets and Equity Sales & Research are subject to internal rules on sound ethical conduct, the management of inside information, handling of unpublished research material, contact with other units of Nordea and personal account dealing. The internal rules have been prepared in accordance with applicable legislation and relevant industry standards. The object of the internal rules is for example to ensure that no analyst will abuse or cause others to abuse confidential information. It is the policy of Nordea that no link exists between revenues from capital markets activities and individual analyst remuneration. Nordea and the branches are members of national stockbrokers' associations in each of the countries in which Nordea has head offices. Internal rules have been developed in accordance with recommendations issued by the stockbrokers associations. This material has been prepared following the Nordea Conflict of Interest Policy, which may be viewed at www.nordea.com/mifid.

Please find a list of all recommendations disseminated by Nordea Equities during the preceding 12-month period here: <https://research.nordea.com/compliance>

Distribution restrictions

The securities referred to in this publication or report may not be eligible for sale in some jurisdictions. This research report is not intended for, and must not be distributed to private customers in the UK or the US or to customers in any other jurisdiction where restrictions may apply.

This research report has not been prepared for distribution outside the EU, the UK or the US. The content of this research report is not a product disclosure statement or other regulated document for the purposes of the Australian Corporations Act 2001 (CTH). The distribution of this research report in Australia has not been authorised by any regulatory authority in Australia, and Nordea Bank Abp is not licensed by the Australian Securities and Investment Commission to provide financial services in Australia.

This publication or report may be distributed in the UK to institutional investors by Nordea Bank Abp London Branch of 6th Floor, 5 Aldermanbury Square, London, EC2V 7AZ, which is under supervision of the European Central Bank, Finanssivalvonta (Financial Supervisory Authority) in Finland and subject to limited regulation by the Financial Conduct Authority and Prudential Regulation Authority in the UK. Details about the extent of our regulation by the Financial Conduct Authority and Prudential Regulation Authority are available upon request.

Nordea Bank Abp ("Nordea") research is not "globally branded" research. Nordea research reports are intended for distribution in the US solely to "major U.S. institutional investors," as defined in Rule 15a-6 under the Securities Exchange Act of 1934. Any transactions with US institutional investors in securities discussed within the research reports will be chaperoned by Nordea Securities LLC ("Nordea Securities"), an affiliate of Nordea and a SEC registered broker dealer and member of FINRA. Nordea Securities does not employ research analysts and has no contractual relationship with Nordea that is reasonably likely to inform the content of Nordea research reports. Nordea makes all research content determinations without any input from Nordea Securities.

The research analyst(s) named on this report are not registered/qualified as research analysts with FINRA. Such research analyst(s) are also not registered with Nordea Securities and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

This publication or report may not be mechanically duplicated, photocopied or otherwise reproduced, in full or in part, under applicable copyright laws.

Fair value and sensitivity

We calculate our fair values by weighting DCF, DDM, SOTP, asset-based and other standard valuation methods. Our fair values are sensitive to changes in valuation assumptions, of which growth, margins, tax rates, working capital ratios, investment-to-sales ratios and cost of capital are typically the most sensitive.

It should be noted that our fair values would change by a disproportionate factor if changes are made to any or all valuation assumptions, owing to the non-linear nature of the standard valuation models applied (mentioned above). As a consequence of the standard valuation models we apply, changes of 1-2 percentage points in any single valuation assumption can change the derived fair value by as much as 30% or more. All research is produced on an ad hoc basis and will be updated when the circumstances require it.

Marketing material

This research report should be considered marketing material, as it has been commissioned and paid for by the subject company, and has not been prepared in accordance with the regulations designed to promote the independence of investment research and it is not subject to any legal prohibition on dealing ahead of the dissemination of the report. However, Nordea Markets analysts are according to internal policies not allowed to hold shares in the companies/sectors that they cover.

Analyst Shareholding

Nordea analysts do not hold shares in the companies that they cover. No holdings or other affiliations by analysts or associates.

Previous rating changes in the past 12 months

Date	To	From
No rating changes		

Distribution of recommendations

Recommendation	% distribution
Buy	59%
Hold	38%
Sell	2%

As of 01 July 2025

Recommendation structure and fair value sensitivity (absolute ratings)

Buy:	Positive share price potential versus our fair value and we see a compelling investment case to buy the share.
Sell:	Negative share price potential versus our fair value and we see a compelling investment case to sell the share.
Hold:	Share in line with our fair value and/or no compelling investment case.

We calculate our fair values by weighting DCF, DDM, SOTP, asset-based and other standard valuation methods. When applicable, we set a 12-month target price by applying an appropriate premium/discount and/or other relevant adjustment to our fair value to reflect the share price potential we see within the coming 12 months. Our fair values are sensitive to changes in valuation assumptions, of which growth, margins, tax rates, working capital ratios, investment-to-sales ratios and cost of capital are typically the most sensitive.

It should be noted that our fair values would change by a disproportionate factor if changes are made to any or all valuation assumptions, owing to the non-linear nature of the standard valuation models applied (mentioned above). As a consequence of the standard valuation models we apply, changes of 1-2 percentage points in any single valuation assumption can change the derived fair value by as much as 30% or more. Dividend payouts are included in the target price. All research is produced on an ad hoc basis and will be updated when the circumstances require it.

Nordea ESG rating methodology

For a description of the methodology used in our proprietary ESG ratings, please refer to <https://research.nordea.com/esg-methodology.pdf>

Equity risk rating

Nordea risk rating: Relais Group Oyj 4

As a measure of the company's operational risk we, apply a risk rating scale of 1-5 where 1 is the lowest risk and 5 is the highest. The risk rating is calculated using a weighted average of earnings/cash flow predictability, earnings quality and backwardlooking asset beta. For the most illiquid stocks, the risk rating is also adjusted for liquidity risk. The risk rating is then converted to asset beta and used to calculate the cost of capital. It is thus implicitly included in our fair value calculations.
